Examiner

***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Perry Palan on December 12, 2005.

The following changes have been made to the subject application:

In claim 1, line 12, after "λo", add --relative to the first conductive via --.

The Examiner's amendment has been made in order to clarify the claimed invention and to place the application in a condition for allowance.

***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance:

The cited art of record fails to teach the dipole antenna comprising the second conductive element including a plurality of spaced conductive strips extending an equal length transverse from adjacent ends of each leg of the U-shape with a combination of all recitations as defined in claim 1, or a ground plane conductor superimposed and separated from the second conductive element by a second dielectric layer, a third conductive element superimposed and separated from the strips of the second conductive element by the first dielectric layer; and a second conductive via connecting the third conductive element to the ground conductor through the dielectric layers as defined in claim 9. Therefore, claims 1, and 3-20 are presently allowed.

Art Unit: 2821

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
